DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by Misumi et al. (U.S. Patent No. 6,483,993 B1).

In the fourth embodiment (starting in column 21 line 21), Misumi et al. discloses a shape extracting means comprising steps S114 and S116 in Fig. 33 (see column 21 lines 54-61); a match calculating means is shown in step S122 and described in column 22 23-37; stored predetermined shapes are described in column 22 lines 25-28; comparison of the degree of match (similarity in the reference) to a predetermined threshold value is described in column 22 lines 29-37 and shown as step S123 in Fig. 33; and a control means to control the photographing portion to photograph is described in column 22 lines 51 and 52 as storing the image in an image file device as one of several alternative actions to the determination that the subject is in a proper expression or pose for photography.

Allowable Subject Matter

3. Claims 2, 3, 5 and 6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
